ABOUT ME

Aspiring Software Engineer seeking campus placement to apply technical skills and build hands-on experience, with a long-term goal of growing into a Project Director role leading innovative technology projects. Demonstrated commitment to learning through hackathons, internships, and self-driven projects. Eager to contribute to dynamic teams and enhance proficiency in full stack development, machine learning, and problem-solving.

SKILLS & LANGUAGES

Web Development, React, HTML, CSS, JavaScript, Java (OOP, Inheritance, Polymorphism, Encapsulation, Exception Handling), Python (NumPy, Pandas), DBMS, SQL, Machine Learning, Full Stack Development, Data Structures, Problem-Solving, Communication, Team Leadership, Prompt Engineering

Languages: English, Hindi, Kannada, Tulu, Konkani

EDUCATION

B.E. Computer Science & Engineering — CGPA 9.2 | SMVITM, Visvesvaraya Technological University | 2023 – 2027

Pre-University Course (PUC) — 93.33% | Vidyodaya, Karnataka PU Board | 2023

SSLC — 97.44% | Sri Anantheshwara, Karnataka State Board | 2020

PROJECTS

1. Coastal Line Soil Erosion Detection

Technologies: Python, Machine Learning, NumPy, Pandas

- Built a machine learning-based system to identify and monitor coastal erosion patterns.
- Applied data analysis and ML techniques for environmental monitoring and prediction.

GitHub Link: <https://github.com/Roshni877/coastal-ai>

2. Graph-Based Social Network Platform

- Technologies:** Node.js, Express.js, Neo4j, Cypher, HTML, CSS, JavaScript, Docker
- Developed a graph-based social networking application using Neo4j and Node.js.
- Modeled users as graph nodes and friendships as relationships to efficiently represent social connections.
- Implemented user registration, friendship management, and friend-of-a-friend (second-circle) search functionality using Cypher queries.
- Built RESTful APIs with Express.js and designed an interactive frontend for managing users and connections.
- Utilized Docker for local deployment and management of the Neo4j graph database.

GitHub Link: <https://github.com/Roshni877/neo4j-social-network>

3. YOLO Object Detection Project

Tech Stack: Python, YOLO (v5), OpenCV, PyTorch / TensorFlow

- Overview:** A real-time computer vision system built to detect, classify, and track multiple objects accurately in static images and live video streams.
- Developed a real-time object detection model using **YOLOv5** and **PyTorch**, achieving high accuracy and low latency inference.
- Utilized **OpenCV** for video frame processing, bounding box rendering, and image manipulation.
- Preprocessed datasets and optimized deep learning pipeline parameters for multi-category object recognition.

GitHub Link: <https://github.com/Roshni877/YOLO-Object-Detection-Project>

4. Interactive Quiz Generator App

Tech Stack: React, JavaScript, CSS3, REST APIs, HTML5

- **Overview:** A dynamic web application that generates interactive, category-based quizzes with real-time scoring and performance feedback.
- Built a responsive single-page application (SPA) in **React** featuring dynamic question generation across multiple topics and difficulty levels.
- Integrated **RESTful APIs** (Quiz API) to fetch real-time questions, options, and instant answer verification.
- Implemented interactive features including custom quiz timers, instant score analytics, and category selection menus.

GitHub Link: <https://github.com/Roshni877/Quiz-Generator>

5. Airline Management System

Technologies: Java, JDBC, MySQL

- Developed a full-stack airline management system using Java, JDBC, and MySQL.
- Implemented flight booking, passenger management, user authentication, and database operations.

GitHub Link: <https://github.com/Roshni877/Airlines-Management-System>

6. News App

Technologies: React, JavaScript, HTML5, CSS3, News API

Developed a responsive React-based news application to display real-time news from multiple categories.

- Integrated News API to fetch and display the latest headlines with search and category filtering.
- Implemented a clean, user-friendly interface with dynamic content rendering using React components and hooks.
- Designed a responsive layout for seamless browsing across desktop and mobile devices.

GitHub Link: <https://github.com/Roshni877/News-App>

ACHIEVEMENTS

- Internship Offer — Dhee Coding Lab, Bangalore
Received a Software Engineering / Development Internship offer after clearing competitive aptitude and multi-stage technical group discussion rounds.
- Winner — Prompt to Product Competition, SMVITM
Awarded 1st Place / Certificate of Merit for rapid prototyping and building an end-to-end product solution.
- Best React Application Award (3rd Place) — React Fusion, SMVITM
Recognized for developing a high-performance, responsive React frontend application with smooth UI/UX workflows.
- IndiaAI Impact Hackathon — Certificate of Achievement
Recognized by IndiaAI for developing innovative AI-driven problem solutions in a high-impact national competition.
- MyFirst Ideathon & Hackathon — JNNCE College, Shimoga (2025)
Participated in both ideathon and hackathon tracks at Yugma Tech Fest, presenting scalable tech solutions.
- Udhbhava Hackathon — NITTE, Mangalore (2025)
Developed and demonstrated a real-time web application within a 24-hour time-constrained competition environment.
- Hakotsava Hackathon — SMVITM College (2025)
Collaborated in a cross-functional team to design, test, and pitch an interactive software prototype.
- AmBITion 2.0 Hackathon — Bangalore Institute of Technology (BIT)
Selected participant for multi-disciplinary hackathon, contributing to frontend development and architecture design.
- Team Collaboration & Hackathon Execution:
Successfully built and presented 4+ full-stack/AI software applications across competitive time-constrained hackathons, handling rapid prototyping, debugging, and live client pitches.

CERTIFICATIONS

Technical & Engineering Certifications

- IBM SkillsBuild: *AI Literacy* — Digital Credential & Certificate of Completion in Artificial Intelligence Fundamentals.

- Techno Hack Solutions: *Full-Stack Web Development Internship Certificate* — Hands-on experience in MERN stack development.
- Great Learning: *Python Fundamentals for Beginners* — Core Data Structures, Algorithms, and Object-Oriented Programming.
- IEEE & IEEE SPAX: *TechLead: Professional Skills for Next-Gen Engineering & Build It All: Full-Stack Engineering Workshop (5-Day)*.

Workshops & Specialized Training

- Git & GitHub: *Hands-on Workshop* — Version control, collaborative workflows, branching strategies, and open-source contributions.
- WebWorks: *Web Development Workshop* — Core competencies in modern HTML5, CSS3, and JavaScript ES6+.
- Be10X: *AI Tools & ChatGPT Masterclass* — Applied prompt engineering and productivity integration using modern AI models.
- SMVITM: *IoT Applications using Arduino Workshop* — Sensor integration and embedded system programming.

Professional Development & Soft Skills

- COMED KARES: *Innovation and Design Thinking* — User-centric prototyping methodology for community problem-solving.
- HP LIFE & HP Foundation: *Introduction to Cybersecurity Awareness & Effective Leadership Online Course*.
- SMVITM: *Financial Literacy* — Value-Added Professional Certificate.
- Indian Institute of Placement: *Placement Preparation Program* — Advanced aptitude, technical presentation, and interview prep.

INTERESTS

Counseling Cell & Peer Student Support Member, Team Leader in Presentations & Mini-Projects, Participant in Hackathons & College Events, Front-End Development, Machine Learning, Prompt Engineering, Communication & Interpersonal Skills
